VIBRATION
RADIATION

Dear children who yet abide in Earth's Schoolroom -

Vibration and radiation are co-existent with be-ing. Let Me explain that a static state of vibration or radiation cannot exist where any center of consciousness is a focus. Even while man sleeps there flows forth from his inert body a radiation which is precipitation of the substance of his lifestream into the Universe.

This law of vibration and radiation being true of the finite, how much more true is it of the Infinite. To say, then, that Nirvana is a state of Ultimate Bliss, which is the highest conscious activity of the Godhead, the Universal "I AM" Presence, and could be without vibration, is a fallacy. Even a blade of grass, a rock, or a flower emits unconsciously a rate of vibration which affects the Cosmos on the whole, which, by the undulation of their energy-wave rearranges the atoms of the entire Universe. Thus all life is constantly contributing to a changing of the strata in which unascended life abide - It is inconceivable that the Godhead Itself, which is the highest and most concentrated Focus of Intelligent Being and Power, can be affected adversely by misqualified energy of any unascended being.

Perhaps the fallacy has arisen from the fact that the vibratory action of the Higher Intelligences is a State of indescribable splendor which can seldom be recognized, perceived nor achieved by the consciousnesses who aspire to experience that State of Perfection. The utter peace, rest and quietude, when experienced by the mortal mind, is interpreted by the returning to consciousness as a place where vibration does not exist, because vibration, to the outer mind usually means noise, motion and restlessness.

Much occult teaching has incorporated the experiences of the ascetics who have, through contemplation, temporarily loosed their consciousness from the moving sea of the vibratory action of the lower realm. The contrast is so great, that, in endeavoring to give worded description, they have conveyed the impression of a static state of Being as against the low vibration which forms the atmosphere of the Earth plane.

Let it be here set forth that the ecstatic bliss of Nirvana, which is the Aura of the Universal "I AM" Presence, is a <u>vibratory action</u> of Positive Peace and not a <u>void</u>, absent of any positive God Vibration and God Virtue.

Dear Hearts, I again ask that you take time daily to still the turmoil of the outer self, quenching all mortal thought and feeling forms thatconstantly assail you and through the use of the Sacred Fires of Purification raise your consciousness to the Higher Planes, for in so doing will you ultimately attain Mastery.

"I AM" with you constantly on your Earthly journey, guiding and guarding you as you make your pilgrimage Homeward.

Love and Blessings.
